## **T \ MANAGERS**

**A few months ago we notified members who were acting as managers to come back up to craft until we had secured a new collective agreement. Most members have done the right thing and returned. There are 10 who have decided to ignore the Union's request and not support our solidarity. We are therefore going foreword with charges against the T/MANAGERS named below. Their selfish behaviour is disappointing and I am sure they will make fine full time managers someday if they are ever confirmed.**
